January, 2026

## A Year of Growth and Impact!

As we begin a new year, we take a moment to reflect with gratitude and pride on what 2025 represented for PanOncology. It was a defining year marked by expansion, scientific leadership, and an unwavering commitment to advancing cancer research and patient care in Puerto Rico and beyond.

### Expanding access across Puerto Rico

In 2025, we celebrated the opening of new clinical sites in Ponce and Manatí, and advanced the development of our Bayamón location, scheduled to begin operations in 2026.

With these additions, PanOncology now operates across 7 locations, strengthening islandwide access to cutting-edge clinical research. We have sites in San Juan Hospital Oncológico, San Juan Ciudadela, Cayey, Ponce, Mayagüez, Dorado, and Manatí.

### Research that drives progress

Since our founding in 2019, PanOncology has conducted 159 clinical studies, of which more than 140 are focused on oncology. Notably, 29% of these studies have been Phase I trials, underscoring our role in early-stage innovation.
