PanOncology Spotlight: Now Open in Carolina & Humacao

PanOncology is expanding eastward. We are proud to announce two new sites now open within our referral network: a new location at Doctor's Hospital in Carolina and a new location at Hospital Ryder in Humacao, extending access to oncology clinical research and specialized cancer care to patients across the eastern region of Puerto Rico.

Our Carolina site is led by Maria Victoria Garcia Pallas, MD and our Humacao site is led by Deena Hallman, MD and medical directo of Ryder Hospital. Both physicians bring deep clinical expertise and a shared commitment to connecting patients with innovative, biomarker-driven treatment opportunities close to home.

Clinical Update: FDA Approves New Treatment Option for Metastatic Pancreatic Cancer

The FDA approved daraxonrasib (RASONQUE, Revolution Medicines) on August 26, 2026, for adults with metastatic pancreatic adenocarcinoma who have received at least one prior line of systemic therapy. PanOncology is proud to have provided patients in Puerto Rico with access to pancreatic cancer treatment through this trial, and we continue to do so through a range of active clinical trials targeting multiple tumor types — including pancreatic, colorectal, and lung cancers with KRAS mutations. We are honored to have been part of the development of daraxonrasib, in partnership with Revolution Medicines, right here in Puerto Rico.
